The Famous Player-Paramount Starwhich beautiful Pauline Frederick is
starring by the Famous Players Film
Company, at the Robinson Grand to-
day, the woman who scored such a
marvelous triumph as "Zaza" far ex-
ceeds her previous performance in the
presentation of this wily serpent-like
woman who poisons the one man who
has tried to lift her from the depths
to which she has sunk. The role of
"Bella Donna" is perhaps the greatest
test to which any actress can be sub-
mitted, for she must be hateful, cruel,
savage, treacherous and at the same
time she must be so fascinating that
she will grip and hold the attention of
her audience throughout the perfor-
mance. And, still more difficult, she
must win the sympathy of her au-
dience sufficiently toward the end of
the story to make her cruel punish-
ment, however just, seem cruelly trag-
ic. This is the well-nigh impossible
feat which this marvelous woman,
Pauline Frederick, has performed in
"Bella Donna."Tomorrow, what is said to be the
world's biggest picture, "Cabiria," will
be presented with "Ruth" or "The
Man-Haters," made in Clarksburg

OIL AND GAS
DEVELOPMENT
OF TRI-STATELatest Reports of Operations in
West Virginia, Pennsyl-
vania and Ohio.Late developments in the Big In-
jun sand development on Fishing
creek Green district, Wetzel county,
W. Va., have again attracted at-
tention to that section. The Wildwoods
Oil Company has completed and put
its No. 4 on the J. B. Whitman farm
to pumping, and it looks good for
fifty or seventy-five barrels a day.
Like all the wells in that district it
has a large quantity of salt water
and its status as a producer cannot
be determined until after the salt
water has been exhausted. The same
company is starting No. 5 located 700
feet southwest of No. 4, an also start-
ing Nos. 2 and 3 on the S. L. Morgan
farm.The Hope Natural Gas Company's
second test on the New Martinsville
Bank's property is a better producer
than first indicated when drilled into
the sand and estimated at twenty-five
barrels a day. The well is pumping
and flowing at the rate of forty bar-
rels a day. Drilling was suspended
when the well was drilled into the
top of the Big Injun sand, conse-
quently has less salt water than the
other wells in that locality. T. C.
Kingsley and Company are due to
get the sand at No. 4 on the J. B.
Whitman farm. The Manufacturers
Light and Heat Company has the
rig completed for a second test onShad, shad for old dad.
You can buy all the fresh fish you
want at Smith's restaurant.

highly recommended and it is hoped
he will avail themselves of the oppor-
tunity of hearing him.

Fine Producer in Cabin Creek.

In the Berea grit development on
Long run, Cabin Creek district, Kan-
awha county, the Columbus Pro-
ducing Company has completed its
No. 12 on the Williams Coal Com-
pany's tract and it is showing for
the best producer in the development
and is a natural producer good for
150 barrels a day. This well is in
advance of production of any com-
pleted up to this time. The location
is one and one-fourth miles south-
west of the initial well on the tract
and shows the pool as developed one
and one-half miles long on the north-
west line. The width of the pool is
less than 500 feet. As a prospect for
new production there is no other pool
in West Virginia that looks so prom-
ising at this time. Fortunately or
unfortunately—owing to the point of
view—the Columbus company holds
leases on all of the territory and the
producing formation must reach out
a long distance before other lease-
holders can get a slice of the "mel-
on." The Columbus company has
now completed twelve wells and all
are producers and the aggregate pro-
duction is above 800 barrels a day.
Nos. 13 to 18, inclusive, are drilling
and the rig for No. 19 has been com-
pleted. Nos. 13, 14 and 15 should
get the sand before the end of the
